## ACCEPTABLE FORMATS:

.ai      .eps      .pdf      .indd (packaged)      .psd      .tiff

## COLOR

Please provide your files in **CMYK** format. All files will be converted if supplied in RGB.  
(Remember that what you see on your monitor might not be what is produced. Low resolution pdf's will be emailed for content proofing purposes.)

## PMS COLORS

If your file contains pms colors please make sure you use **Solid Coated Colors**. Please note that if this job prints digitally, we cannot ensure we will hit the Spot color when printing but will do our best to achieve the color.

## FONTS

Please convert all fonts to outlines (convert to curves). If you decide to supply native files, please package all fonts within the file. When exporting a pdf, please outline the fonts before exporting.

## ARTWORK/PICS

Please embed all artwork within your file. INDESIGN USERS: indd files need to be packaged.

Large format graphics usually print well between **75-150 DPI** depending on the viewing distance. Litho or offset files need to be provided at 300 DPI.

## LARGE FORMAT GRAPHICS & SIZE

Large documents such as banners, billboards, etc will almost always be too large for your artboard or document size. It is much easier to work in 10% size versus 25% or 50%. 10% size requires no math.

EXAMPLE: 240" X 600" @ 74 DPI document will be 24" x 60" @ 740 DPI.

**QUESTIONS OR CONCERNS? PLEASE CONTACT THE ART DEPARTMENT AT 909.781.6356 OR EMAIL: [jgonzalez@amgraph.biz](mailto:jgonzalez@amgraph.biz)**
